Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.

Team Work Allocation

S.No	Team Member	Work Assigned
1	Divya K	External entities (Student, Google Gemini API) and Process 1: Request Handling
2	Veronica	Process 2: Explanation
3	Sangeetha T	Process 3: Gemini Services (Q&A, Quiz, Summary, Learning Path)
4	Pooja N	Process 4: Response Display and the data stores
5	Monika N	Data flow arrows and labels, and final review of the diagram
