

Coding & Solution

Date: 01 October 2026

Team ID: SWTID-2026-8809

Project Name: EduGenie: Google Gemini Powered Learning Assistant

Maximum Marks: 5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented EduGenie solution. The project should demonstrate working functionality, clean code practices, modular design, and alignment with the defined learning-assistant requirements.

Instructions

1. Ensure the code is well-structured, commented, and follows best practices for the selected technology stack.
2. Implement the core EduGenie requirements including Q&A, explanation, quiz, summary, and learning recommendations.
3. Include source files, configuration files, dependencies, and setup/run instructions.
4. Maintain the project in a version-control repository and keep the modules organized.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python, HTML, CSS
Framework(s) Used	FastAPI, Jinja2; Google Gemini API; LaMini-Flan-T5
Key Features Implemented	Q&A, concept explanation, quiz generation, summarization, personalized learning recommendations
Pending / Incomplete Features	To be updated after final testing
Setup / Run Instructions	Install dependencies, configure Gemini API key, then run with: uvicorn main:app --reload

Team Work Allocation

S.No	Team Member	Assigned Responsibility
1	Divya K	Project coordination, overall architecture, model selection, folder structure, integration review and final coordination
2	Veronica	Q&A and Explanation modules; backend logic for /qa and /explain; testing of question answering and concept explanation
3	Sangeetha T	Quiz and Summary modules; quiz generation, JSON response handling, summarization logic and related testing
4	Pooja N	Learning Path module and FastAPI backend endpoints; /learn/recommendations integration and API testing.
5	Monika N	Frontend development and live integration; HTML/CSS interface, form submission, result display, responsive design

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / modules	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	To be verified
6	Code is committed to a version control repository	To be updated

Additional Notes / Comments

The work allocation is assigned in the exact order of the team-member names provided. All members should coordinate during final integration and testing. The project documentation describes FastAPI endpoints for /qa, /explain, /quiz, /summarize and /learn/recommendations, along with a simple HTML/CSS frontend.
